Allowable Subject Matter/Reasons for Allowance

8. Claims 1-27 are allowed.

9. The following is an examiner's statement of reasons for allowance: The closest prior art located or identified by the Examiner is Szul. Szul teaches a process for introducing multiple catalysts into a gas or slurry reactor comprising introducing a first catalyst and an activator and a second catalyst and an optional activator into the reactor. See Szul, Abstract; col. 1, lines 31-60. Szul discloses that the catalyst may be as slurry and/or solution products with support activators. See Szul, col. 15, line 25 through col. 26, line 59. Szul also mentions the use of phenoxide catalyst. See col.

12, line 41 through col. 14, line 40. The present invention differs from Szul in that the present invention requires at least 50% of the catalyst compounds on or in the support.

10. As of the date of this Notice of Allowability, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Szul to render the present invention anticipated or obvious to one of ordinary skill in the art.

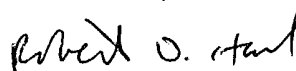

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
